The Pavilion Ricardo Bofill consists of an architectural masterpiece placed on 12 hectares of natural agricultural park and forest garden. The project has been designed by the renowned architect Ricardo Bofill himself.

The Pavilion Ricardo Bofill will be rented out as one entire unit, fully serviced with 12 suites. Through this accommodation, we will provide opportunities to bring high-level tourism to support the community and local businesses in this region.

The project is located near Almada, situated on the southern margin of Lisbon. It has a privileged view of all Belem monuments and on

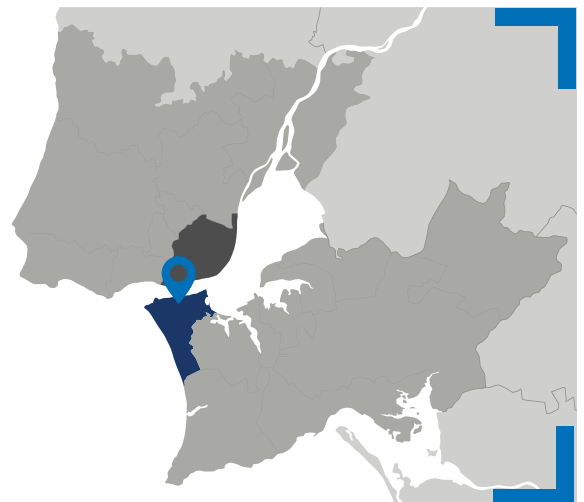

the magnificent River Tejo. The two areas are connected by the famed 25 de Abril Bridge, and easily accessible by car and also by ferry from the Porto Brandão and Trafaria ports.

This specific project is the last project that Bofill personally designed and the only pavilion he has ever drawn. Bofill has designed over 1000 projects, however, Pavilion Ricardo Bofill was known to be his 'lighthouse' project alongside the new city of Beijing and the The Noble Qur'an Oasis in Riyadh. It is a beacon for design and environmental innovation.

The Pavilion Ricardo Bofill is a paragon of exemplary architecture.

Gross construction area approx. 2400 sqm

12 Junior Suites
Up to 36 guests
Indoor gym and outdoor
Vita-parcours,
Yoga room,
Kids playroom,
Spa,
