

7TH TO 21ST OCTOBER
2024

TRAFARIA PRESÍDIO AND ADJACENT SPACES

RESIDENCY

ART

+ + TECHNOLOGY
+ + AT TRAFARIA

trafariacriativa.art

In this residency we seek to bring together what seems divided, combining art and technology experiences in order to reflect on design processes, find working methods, have a **local impact** and **global visibility**. We intend to explore the dialogue between Art and Technology, promoting the creation and development of **artistic proposals** that question and explore the relationship between society, the individual, art and technology.

Applications are invited from people with relevant artistic and/or technological experience in performance, physical computing, sensors, microprocessors, image, audio and video.

Eight candidates will be selected and awarded a grant of **€1,000** for the development and production of an artistic proposal with technological components. Equipment will also be provided for the development and exhibition phase.

Applications must be sent by email to **trafariacriativa@gmail.com** and include portfolio, brief CV and motivation letter, by **September 5th**. Additionally, applications may contain a concrete proposal for a project under development or to be developed. Proposals should not only use technology, but also reflect on its impact on society and culture, especially in Trafaria.

The work will be carried out during the day, but with flexibility, for example for classes and other academic commitments. Occasional activities are planned, including workshops or short courses during the residency.

**UNTIL 5TH
SEPTEMBER**
Submission of
proposals
